100% CONFIDENTIAL SERVICE

With public concerns related to mercury becoming more common, it is essential to have a partner that you can trust with your mercury compliance needs.

- Although it is unusual, if we identify mercury in excess of acceptable levels, we will provide you with a free and completely confidential consultation regarding the available options for removal and decontamination.
- We use several affordable, safe, and scientifically proven methods to lower mercury vapor to acceptable levels.
- Once your mercury levels are below the NIOSH (REL) recommended exposure limit, we will provide you with a "NIOSH Mercury Compliant" certificate.
- Your data will be held in strict confidence and only released with your written consent.

COMPANY
